# OUR PRODUCTS

## On Grid System

- Grid-Tie system allows you to sell excess electricity back to the grid utility with net metering system.
- Work without batteries and hence very low maintenance and requires less monitoring
- Can be designed with and without batteries.

## Off Grid System

- This type of solar electric system is not connected to electricity grid
- Stand alone system for remote areas.
- Can be designed to provide power for a certain number of days (nights) in row when sun is not available.

## Solar Water Pump

- Each solar array has a number of solar modules connected in parallel or series.
- The electrical energy from the entire array is controlled, tuned and directed by the inbuilt controller in DC pumps or through the Variable Frequency Drive (VFD) and enables the connected pump (may be submersible or surface) to draw water and feed the delivery pipelines.
